User:JAY SUVAGIYA

From Wikipedia, the free encyclopedia

Wikipedia does not have a user page with this exact name. In general, this page should be created and edited by **User:JAY SUVAGIYA**. If in doubt, please verify that **"JAY SUVAGIYA" exists**.

- **Start the *User:JAY SUVAGIYA* page.**
- Search for **"JAY SUVAGIYA"** in existing pages of namespace User.
- Look for pages within Wikipedia that link to this title.

Other reasons this message may be displayed:

- If a page was recently created here, it may not be visible yet because of a delay in updating the database; wait a few minutes or try the purge function.
- Titles on Wikipedia are **case sensitive** except for the first character; please check alternative capitalizations and consider adding a redirect here to the correct title.
- If the page has been deleted, check the **deletion log**, and see **Why was the page I created deleted?**

Types

[edit source]

Procedures for using both emergency and preventive lockdowns must be planned.^[2] LOCKDOWN is very wast time

Preventive lockdown

[edit source]

See also: Preventive action

A preventive lockdown is a preemptive action plan implemented to address an unusual scenario or a weakness in system to preempt any danger to ensure the safety and security of people, organisation and system. The focus for preventive actions is to avoid dangers and risks arising from the nonconformity to the normal circumstances, but also commonly includes improvements in efficiency.

Preventive lockdowns are preemptive lockdowns to mitigate risk. Most organisations plan for the emergency lockdowns but fail to plan for other situations that might quickly degrade to dangerous levels. These protocols must be based on the type of threat, and should be kept simple and short for quick learning and implementation, and flexible enough to handle several scenarios. This allows administrators more options to choose from which are easier to use in various scenarios. For example, in case of a loud scene by a parent or an unarmed petty thief being chased by the police through the school playground, this flexible procedure allows school administrators the flexibility to implement a more limited lockdown while teaching in school continues, thus eliminating need for complete emergency lockdown, disruption and delays in resumption of teaching, etc. The consequences of not having procedures to implement such lockdowns is that the situation might quickly escalate where there could be loss of human lives.^[2]

Emergency lockdown

[edit source]

See also: Emergency procedure

Emergency lockdowns are implemented when there is imminent threat to the lives or risk of injury to humans, for example, a school's emergency lockdown procedures must be kept short and simple to make
